

THINK VISUALIZATION

Monitoring Your Technology is Our Business

We monitor, detect, and predict IT/Business operation issues in real-time.

N3N is the World's #1 Visualization IoT solution

COMPANY OVERVIEW

Monitoring your technology is our business

We use the power of patented real-time visualization technology to help teams locate and solve problems in their IT Operations, Applications, Infrastructure and Business Systems via a Single-Pane-of-Glass.

Innovation means a lot of different things to different people. At N3N we believe innovation bridges the gap between the old way of doing things and the new way. We don't just innovate to innovate, we innovate to make things better.

At N3N we build software that makes people's lives better by providing easy to use software which monitors, detects and predicts issues as easy as turning on a light switch.

Everyday we monitor billions of pieces of data for global brands:

CUSTOMER QUOTE

Every N3N product has broken new ground and nicely integrated with our own technology platforms.
